tailored treatment plans for the
best outcome possible

Comfort care and quality of life

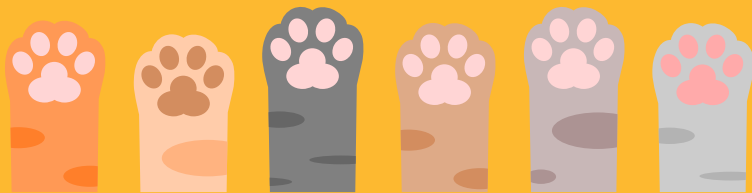

pain management and
quality of life support

Compassion. Expertise. Hope.

Specialized cancer care for your pet

At ACES Oncology, we provide advanced cancer treatment and support for your beloved pet. Whether there's already a cancer diagnosis, suspected cancer, or your pet's breed is at higher risk, our dedicated team is ready to focus on your pet's specific needs and well-being.

Get an appointment with Dr. Sommer

Our board certified oncology specialist, Dr. Breann Sommer, and her experienced team are committed to providing the best care for your animal companion.

Dr. Sommer will work closely with you and your primary veterinarian to develop a personalized treatment plan. Treatment options for cancer can include surgery, chemotherapy, immunotherapy, and/or comfort and palliative care.

Most pets tolerate chemotherapy very well, since the doses used in pets are gentler than what's used for people. Our goal is always to maximize comfort and maintain quality of life.
